HEALTH BENEFITS OF INDOOR PLANTS

Increase Productivity

Enhanced productivity by 10% due to psychological engagement

Produce Oxygen

Provide oxygen & remove carbon dioxide from the air

Purify Air

Purifies the air and removes toxic emissions such as VOC's (Volatile Organic Compounds)

Health & Wellbeing

Reduce blood pressure, fatigue and headaches

Decrease Stress

Reduce stress and negativity

Absorb Noise

Deflection, refraction and absorption of sound

Humidity

Improves air humidity through a process called transpiration. This cools the air and helps to reduce energy costs

Enhance Environment

Shows you care about your organisation and employees

Green Star Building

Plants and a professional indoor plant maintenance program assist with a Green Star Building

VOLATILE ORGANIC COMPOUNDS

The modern indoor working environment can fill with many harmful toxins known as Volatile Organic Compounds (Formaldehyde, Benzene, Xylene etc)

These harmful VOC's are emitted from:

- Carpets
- Laminates
- Adhesives
- Computers
- Printers
- Electronic Equipment
- Photocopiers
- Plastics

They can have major detrimental effects on our health.
